

# Ex Redstone - a Wired Redstone add-on

## Anchor

e r e e = Eye of Ender  
r c r r = Ender Alloy  
g g g g = Chorus Fruit  
g g g g = Gold Ingot  
→ 1 (1200t x 500e/t)  
Powers Ender Alloy wire.

## Destabilized TNT

d P d d = Destabilized Ender Pearl  
P d P d = Chorus Paper  
d P d → 1 (6000t x 20e/t)

Although injecting energy rapidly into an already destabilized Ender Pearl can make it explode, slowly adding energy can push it close to its full potential. Detonating Destabilized TNT releases enough energy to blow a hole in space itself, creating a Rift.

## Eye of the Rift

Eye of Ender → Rift  
A variant of the Eye of Ender that leads to the Rift it is bound to, but never breaks. Shift-clicking this on an Entwine Frame opens a passage through the rift, allowing transfer of items and fluids.

## Chorus Paper

Paper  
Deploy Chorus Fruit  
Press  
Deploy Popped Chorus Fruit  
Cut on Saw  
Press  
x3 → 80% Chorus Paper x4  
10% Purpur Slab  
7% Purpur Stairs  
3% Purpur Block

## Ender Alloy

Lava Bomb  
2 Red Alloy  
4 Entwine  
→ 1 (Superheated)

Used to make ender components.

## Ender Alloy Wire

Gold Ingot  
Press  
Deploy 1 Ender Alloy  
Cut

x6 → 80% 12, 20% Eye of Ender x4-7  
Can be powered by an Anchor to keep the current chunk loaded. 1 anchor has 256 blocks of charge. Two blocks of Ender TNT connected by this will create a Rift.

## Destabilized Ender Pearl

Ender Pearl  
Redstone  
Gunpowder  
Glowstone Dust  
→ 1 (20t x 5000e/t)  
Injecting powders and a large amount of energy into an Ender Pearl compromises its internal structure. We are not liable from any damages arising from throwing this.
